

Deter Violence with Targeted Security Screening

Industry Note - Employee Safety

★ WHY ISCON?

ISCON Imaging provides safe, high-resolution, whole-body, and handheld scanners that quickly identify concealed items without violating personal privacy. ISCON Imaging helps you prevent losses and protect employees.

Don't Be A Statistic:

- There are 2 million victims of workplace violence every year
- Costs range from \$6.4 billion to \$36 billion annually before legal fees
- Legal settlements are around \$500,000 and jury awards usually reach \$3 million per case
- There were 698 deaths by intentional injury in 2012
- 463 of those deaths were ruled as homicides

Statistics from
Bureau of Labor Statistics
Cornell HR Review
National Institute for the Prevention of Workplace Violence

ISCON's patented thermo-conductive technology combines infrared (IR) and heat transfer for high-resolution imaging without the use of harmful ionizing radiation. The camera sees the thermal imprint of concealed objects against the clothing.

Gun Hidden in Pant Leg

Deterrence Solutions from ISCON

Workplace violence is an emerging threat that plagues all types of businesses in the United States. These events cost companies millions of dollars a year in both liability and incidental costs.

Companies are increasingly being urged by authorities such as OSHA to implement solutions to ensure employee safety in the workplace. Failure to do so can lead to significant fines and or legal judgments.

Concealed weapons, and contraband especially nonmetallics, can readily be brought into a facility that lacks a targeted security screening protocol.

Many Challenges And One Solution

SecureScan™ Body Imager

SecureScan™ enables whole-body screening that lets you see objects hidden under clothing, without privacy or health concerns. It is an automated platform that utilizes Iscon's patented thermo-conductive infrared technology. It is user friendly for both operators and screening subjects.

Recent Events

Location: AL, USA Distribution Center

Timing: September, 2014

Incident: Employee Kills Former Coworkers then Commits Suicide

An Employee who had been terminated the previous day entered the facility in his uniform with a concealed gun. He proceeded to shoot and kill his former supervisor and a coworker before committing suicide.

Location: OK, USA Distribution Center

Timing: September, 2014

Incident: Employee Kills and Injures Former Coworkers

An employee who had been suspended earlier in the day returned to work with a large kitchen knife. Upon entering the building he attacked and beheaded one of his former coworkers. He then attempted the act on another employee before being shot and injured by a supervisor, but not before injuring the second victim.

Workplace Violence Solution:

Targeted screening of all personnel entering a facility can help detect weapons and contraband that could result in workplace violence. Contact us to help you choose the best ISCON Imaging solution for your needs.
