

PRESS RELEASE

ISCON Imaging Launches Revolutionary Handheld Imager Aimed at Targeted Security Screening for Loss Prevention and Employee Safety Applications

Woburn, Mass., February 24, 2015 – [ISCON Imaging, INC.](#), a manufacturer of patented infrared (IR) imaging screening systems, has unveiled its new [FocusScan™](#) handheld imager for targeted personnel scanning. FocusScan is the first-ever IR-based handheld imaging technology purpose-built for use in loss prevention, security enhancement and asset protection.

FocusScan enables targeted screening of individuals, providing a detailed view of any objects hidden under clothing. The device delivers high-resolution images that allow users to enhance safety and reduce loss while minimizing privacy concerns and eliminating radiation exposure. It records images securely for investigative purposes. An intuitive touchscreen interface streamlines usability, while the handheld platform also features an embedded metal detector for enhanced detection. FocusScan is completely portable and leverages ISCON's patented thermo-conductive infrared technology.

“FocusScan is a handheld imager designed for random security checks in high-value areas, including retail distribution sites and warehouses,” said Kathleen Tighe, Director of Sales and Marketing, ISCON Imaging. “It is purpose-built for loss prevention and employee safety applications, and its handheld design allows security personnel to quickly and easily identify concealed objects, allowing a more proactive approach to controlling loss and increasing security.”

According to the [26th Annual Retail Theft Survey](#) released in 2014, 78,085 dishonest employees were apprehended in 2013, up 6.5% from 2012. More than \$55 million was recovered from employee apprehensions in 2013, up 2.5% from 2012, and one out of every 39.5 employees was apprehended for theft. FocusScan can help retail organizations capture incidents of loss before the employee leaves the facility, ensuring robust LP recovery numbers.

“Retail organizations across the globe face numerous challenges, and ISCON is dedicated to helping our customers better address common pain points head on,” said Bill Gately, CEO, ISCON Imaging. “By providing comprehensive screening solutions, such as FocusScan, we help close vulnerabilities in LP operations, while ensuring a safe workplace environment.”

At the upcoming [RILA Retail Supply Chain Conference](#), being held Feb. 23-25 at the Gaylord Palms Resort & Convention Center in Orlando, Fla., ISCON Imaging will

demonstrate the benefits and capabilities of the FocusScan solution at [booth #315](#). To schedule a demonstration or appointment, contact ISCON at info@isconimaging.com.

About ISCON Imaging

Founded in 2006, ISCON Imaging provides safe, high-resolution, whole-body scanners that quickly identify concealed items without using radiation or violating personal privacy. ISCON's patented thermo-conductive technology combines infrared (IR) and heat transfer for high-resolution imaging. Its robust product portfolio includes the [Mini Portal](#), SecureScan and FocusScan mobile scanners. ISCON Imaging solutions help protect personnel, products and infrastructure in a variety of markets across the globe. For more information, visit <http://www.isconimaging.com>.
