The River Habitat Survey (RHS)  
Toolbox software was developed  
to enable RHS surveyors to  
prepare for RHS surveys, input

identify potential errors, calculate  
indices and perform contextual  
analysis using the RHS baseline

of sustainability traces  
human-dominated ecological

This history is characterized by  
the increased regional success of  
a particular society, followed by  
crises that were either resolved,  
producing sustainability, or not,  
leading to decline. Thu, 12 Apr
